

CONTENTS

Special Session F. Baltic sea ice

Summary of recent studies on the contribution of meteoric ice to landfast sea ice growth in the Baltic sea. <i>M. A. Granskog</i>	1
Horizontal variations in biogeochemical characteristics of landfast sea ice in the gulf of Finland (The Baltic sea). <i>M. A. Granskog, H. Kaartokallio, D. N. Thomas, J. Ehn, H. Kuosa, E. Sonninen</i>	5
Airborne EM sea-ice thickness profiling over brackish Baltic sea water. <i>C. Haas</i>	12
Sea ice biota in the northern Baltic sea in February and April 2002. <i>J. Ikävalko, I. Werner, T. Roine, K. Karell, M. Granskog, J. Ehn</i>	18
100 years of ice observations on the German Baltic sea coast. <i>N. Schmelzer</i>	24

Special Session G. Ice engineering issues for offshore structures

A gouging model for a first-year ice ridge penetrating the seabed. <i>S.A. Vershinin, P.A. Truskov, K.V. Kouzmitchev</i>	33
An approach for ridge load determination in probabilistic design. <i>T. Kärnä, E. Nykänen</i>	42
First-year ice ridge loads on cylindrical supports. <i>G.A. Surkov</i>	51
Caspian sea sprayed ice protection structures. <i>J. Bastian, A.G. Strandberg, W.P. Graham, D. Mayne</i>	58
Probabilistic analysis of seasonal ice loads on the molikpaq. <i>G.W. Timco, R. Frederking</i>	68
Tide and wind induced sea-ice drift and ice cover deformations in the vicinity of the molikpaq drilling platform, Northeastern Sakhalin. <i>V. Tambovsky, P. Truskov, G. Shevchenko</i>	77
Modeling of level ice action on floating anchored structure concepts for the Shtokman field. <i>K.N. Shkhinek, A.S. Bolshev, S.A. Frolov, A.A. Malyutin, V.A. Chernetsov</i>	84
A Method and tool for predicting static ice loads on dams. <i>G. Comfort, A. Liddiard, R. Abdelnour</i>	96
Dynamics of elements of hydrotechnical structures (HTS) interacting with ice covering. <i>D.V. Kozlov, P.F. Sabodash</i>	105

Protection of maritime power structures against ice impact in Russia. <i>I.N. Usachev</i>	118
Design and model testing of ice barriers for the protection of offshore structures in shallow waters in winter. <i>K.-U. Evers, A. Weihrauch</i>	124
Oscillations of a drilling platform caused by the ice cover and wind impact. <i>V.N. Smirnov, V.G. Korostelev, S.I. Shibakin</i>	132
Full-scale tests of dynamic ice force in Bohai bay. <i>Q. Yue, X. Bi, F. Li, Y. Qu</i>	139
Application of a borehole jack for determining the local strength of fresh and sea ice. <i>S.M. Kovalev, V.G. Korostelev, V.A. Nikitin, V.N. Smirnov, A.I. Shushlebin</i>	147
Features of the ice drift response to the wind Influence on the Northeastern Shelf of Sakhalin. <i>E. Tikhonchuk, G. Shevchenko</i>	154
On the accuracy of the ice-specific design values derived from long-term observations. <i>D.A. Onishchenko, S.I. Shibakin</i>	163
Pressure / area measurements from the grappling island iceberg impact experiment. <i>R. Freeman, R. McKenna, G. Crocker, K. Croasdale</i>	171
Confederation bridge – the relation between model and reality. <i>T.G. Brown</i>	179
Fracture of the ice cover in a converging channel. <i>S.E. Alexandrov, R.V. Goldstein, N.M. Osipenko,</i>	189
Thetis spray / chip ice islands for harrison bay, Alaska. <i>D.M. Masterson, R. Cooper, P.A. Spencer, W.P. Graham</i>	196
Sliding resistance of grounded spray ice islands. <i>A. Barker, G.W. Timco</i>	208

Special Session H. Escape, evacuation and rescue in ice

Seascape system of evacuation. <i>D.P. O'Brien</i>	217
Arctic offshore escape, evacuation and rescue. <i>F.G. Bercha</i>	223
Reliability assessment of Arctic EER systems. <i>F.G. Bercha, M. Cerovšek, W. Abel</i>	232
Ice jams in the mouth of Vistula river and the danger of floods. <i>W. Majewski, T. Kolerski</i>	241

Special Session I. Numerical modeling of ice processes

On predictability of elastic-plastic sea ice dynamics models. <i>R. S. Pritchard</i>	247
Numerical modeling of protective structures in the Caspian sea. <i>A. Barker, K. Croasdale</i>	257
Modeling ice rubble with pseudo-discrete continuum model. <i>S. Shafrova, P. Liferov, K. Shkhinek</i>	265
Ice dynamic model with a viscoelastic-plastic constitutive law. <i>S. Ji, H. T. Shen, Z. Wang, H. Shen, Q. Yue</i>	274
Thermodynamic consolidation of sea ice ridges. <i>Aleksey Marchenko, Alexandr Makshtas, Yurii Gudoshnikov, Gennadii Zubakin</i>	282

Special Session J. A workshop of ice crushing

Side-viewing high-speed video observations of ice crushing. <i>R. Gagnon</i>	289
In-situ fracture of first-year sea ice in McMurdo sound. <i>J. P. Dempsey, Z. Mu, D. M. Cole</i>	299
Ice pressure variations during indentation. <i>R. Frederking</i>	307
Post-terminal compressive deformation of ice: friction along Coulombic shear faults. <i>A. Fortt, E.M. Schulson</i>	315

Special Session K «A workshop on methods of calculations of thermal regimes in upstream and downstream of hydropower stations»

Simulation of flow and thermal conditions downstream of limestone generation station. <i>L. Liu, H. Li, H.T. Shen, B. Shumilak</i>	323
Exploiting specifics of the hydraulic engineering structures of the water power plants in winter period <i>A.G. Vasilevsky</i>	332
Ensuring of operation of withdrawals in frazil-ice conditions. <i>I.N. Shatalina, G.A. Tregub, N.S. Bakanovichus</i>	335
The numerical modeling of hydro- ice-thermal processes in reservoirs. <i>V.I. Klimovich, V.A. Prokofiev, I.N. Shatalina, G.A. Tregub</i>	344

Hydroplus fusegate system: Analysis of winter monitoring data at the Khorobrovskaya HPP. <i>V.B. Rodionov, G.F. Onipchenko</i>	351
Water temperatures at different regulation regimes in Suldalslaagen, a Norwegian salmon river. <i>A. S. Kvambekk</i>	359
Research of ice conditions for the structures of Tugur tide power station. <i>S.I. Kovalevsky, L.M. Monosov, A.M. Tsibin</i>	367
Modeling of ice cover in experimental basins. <i>V. Zuev, E. Gramuzov, M. Balakshina</i>	370
